iSirona Named Best in KLAS for 2011

Report ranks device connectivity provider #1 for medical device integration

PANAMA CITY, Fla.—December 21, 2011—iSirona®, a provider of simplified solutions for medical device integration, today announced that it has been named Best in KLAS for medical device integration systems in the *2011 Best in KLAS Awards: Software & Services* report. Published annually, the report ranks vendors in key market segments of healthcare information technology based on interviews with customers.

“Being named Best in KLAS is a true reflection of our commitment to our customers,” says Dave Dyell, iSirona CEO and founder. “We are proud of our device integration technology, and we’re every bit as proud of our exceptional employees, who work very hard to provide our customers with the simplest yet best solution for device connectivity.”

KLAS rankings measure a vendor’s performance in the areas of product quality, implementation, and service and support. The top-rated companies in key market categories earned the 2011 Best in KLAS distinction, signifying their leadership in meeting customer expectations.

To learn more about the *2011 Best in KLAS Awards: Software and Services* report, or to purchase the full report, healthcare providers and vendors can visit www.KLASresearch.com/reports.

About KLAS

KLAS is a research firm specializing in monitoring and reporting on the performance of healthcare vendors. KLAS’ mission is to improve delivery by independently measuring vendor performance for the benefit of healthcare provider partners, consultants, investors, and vendors. KLAS measures performance of software, professional services, medical equipment, and infrastructure vendors. For more information, go to www.KLASresearch.com.

About iSirona

Panama City, Florida–based iSirona helps clinicians make more informed decisions about patients by providing an easy to use approach to medical device integration. Using iSirona’s software solution, hospitals can connect virtually any medical device to their CIS, providing clinicians with faster access to more accurate patient information.
